Subject: Enterprise Oil Removal Action, Detroit, MI

Latitude: 42 23' 47" Longitude: 83 07' 28"

Polrep No.: 1st and final

Site ID: PG Delivery Order No.: 5001-05-319

Response Authority: CERCLA NPL Status: Non-NPL

Start Date: April 22, 1993

Completion Date: October 1, 1993

# 1. Situation:

- A. This pollution report serves to clarify the start and completion dates of all Federal lead removal actions which were discussed in polreps dated August 26, and August 31, 1993, and September 14, 1993. These were identified as polrep 1-Phase II, polrep RV2-1, and polrep RV3-1 respectively; and also clarifies the October 17, 1993, polrep described as 19th and final.
- B. Termination of previous ERCS IT corporation contract required issuance of a new delivery order to new ERCS contractor, Riedel Environmental Services (RES), in order to continue federal removal actions. This D.O. was to initiate sampling activities for a bench scale treatability study to determine if on-site soil contamination could be remediated thru bio-remediation. This phase of the removal action is should have been referred to as RV3. See polrep dated 8/26/93 for further details.
- C. Federal lead removal activities for RV3 were completed on October 1, 1993, when the bench scale treatability study final report was received by the OSC, thus completing all requirements under the D.O.. Therefore: federal lead removal action dates are as follows:

## RV1: PRP Lead

Start Date: December 26, 1992

Completion Date: February 28, 1992

## RV2: Federal Lead (IT CORP)

Start Date: June 16, 1992

Completion Date: December 4, 1992

*RV#2*

RV3: Federal Lead (Riedel)

Start Date: April 22, 1993  
Completion Date: October 1, 1993

2. ACTIONS TAKEN:

- A. See polreps listed above for any details. This polrep just serves to once and for all clarify the dates of removal activity at the site.
